

## INDMEX Aviation Expands Operations Into RagingWire's Ashburn Data Center

*Expansion Improves Support for the Aviation Industry's Mission Critical Systems with Guaranteed 100% Uptime and the Patented Design of the RagingWire Facility in the Heart of 'Data Center Alley'*

**Ashburn, VA – February 18, 2015** - INDMEX Aviation, a fast growing provider of applications and services to Airports and Air Navigation Service Providers (ANSPs) worldwide, today announced the growth of its hosted services infrastructure by entering into a strategic agreement with Unleashed Technologies to expand its data center operations into the state-of-the-art RagingWire data center in Ashburn, Virginia.

“As INDMEX continues to grow, we sought a highly qualified and knowledgeable set of partners that would exceed the stringent needs for reliability and security that are required in the aviation industry. We found these partners in Unleashed Technologies and RagingWire Data Centers,” said Carlos Nevarez, INDMEX CEO and Founder. “With the help of Unleashed Technologies, we are thrilled to be expanding into RagingWire’s Ashburn data center. This facility delivers the necessary infrastructure for INDMEX to offer and support mission critical systems for airports and the aerospace industry today and into the future.”

“Unleashed Technologies is very happy to support INDMEX Aviation’s growth as it expands the availability of its innovative solutions to its domestic and international clients. By partnering with Unleashed Technologies, INDMEX offers its clients the security of 100% uptime provided by RagingWire’s patented infrastructure,” said Ryan Barbera, President of Unleashed Technologies. “We are proud to facilitate this advance for INDMEX.”

Conveniently located in Ashburn, VA, just minutes from INDMEX Aviation’s headquarters in Herndon, VA, RagingWire’s VA1 data center delivers 100% infrastructure uptime through its patented 2N+2<sup>®</sup> design and superior operations. The facility is carrier neutral offering connectivity to 13 telecommunications providers, and highly secured as demonstrated by the extensive list of compliance certifications including: PCI DSS 2.0, SSAE 16 Type 2 SOC 1 and SOC2, FISMA Moderate, and the HIPAA security standards. In addition, RagingWire has earned the US Environmental Protection Agency Energy Star certification and LEED Gold certification, ensuring that operations are conducted in an energy efficient manner with minimal environmental impact.

### About INDMEX Aviation

INDMEX Aviation is a revolutionary software and engineering firm, established by surveillance, information technology and engineering experts to deliver a new standard of solutions to the aerospace industry. INDMEX’s patented applications leverage commercial off the shelf platforms to provide cost effective and innovative solutions to airports and ANSPs. For more information, please visit:
